

REPORT ON BLOOD TYPING- PURPOSE AND PROCEDURE

An activity on identification of blood groups was organized on 18th November 2022 for BSc.2nd year students of Department of Zoology. Blood typing is a fast and easy way to ensure that you get the right kind of blood during surgery or after injury. If you get incompatible blood it can lead to blood clumping or agglutination which can be fatal. The students of B.Sc.II year, after learning the procedure of identification of blood groups from their teacher Dr. Nidhi Dhatwalia, Assistant Professor Department of Zoology, practically demonstrated the procedure to Arts students of GDC College, Theog. Arts students were elated to know their blood groups. The activity instilled confidence and leadership qualities in science students. It was an enriching experience for both science and arts students who thoroughly enjoyed the activity.
