

## REPORT ON PEER TEACHING ON THE TOPIC THE EVOLUTION OF HORSE BY NIDHI SHARMA, B.SC II YEAR

An activity was organized by Dr. Nidhi Dhatwalia, Assistant Professor Department of Zoology GDC Theog on 3/11/2022. She highlighted the importance of peer teaching and following points were emphasized to encourage students to participate in peer teaching activities:

1. Improved student retention rate: Peer teaching can create a more collaborative learning environment, which is beneficial for students who are struggling with a particular concept or topic.
2. Increased engagement: Peer teaching encourages students to work together, discuss ideas and ask questions, creating a more engaging learning experience.
3. Enhanced self-confidence: By teaching their peers, students gain more confidence in their knowledge and skills as well as their own ability to be successful in the classroom.
4. Strengthened relationships: Students often build stronger relationships through peer teaching activities since they have the opportunity to help each other understand concepts better and learn from each other's unique perspectives on the same topics.
5. Increased motivation: When working collaboratively with others, it can be motivating for some students who are eager to share what they know and help out their peers in understanding difficult concepts or material better.

Nidhi Sharma student of B.Sc. II year deliberated on the topic 'The Evolution of Horse.'

The lecture was very informative and she was applauded by all.
