Report on Blood Donation Camp

A Blood Donation Camp was successfully organized by the Red Ribbon Club, NSS, and Road Safety Cell of Government Degree College, Theog, in collaboration with Indira Gandhi Medical College (IGMC), Shimla, on 4th December 2024. The camp aimed to promote voluntary blood donation and create awareness about its importance in saving lives.

The event was inaugurated by the Principal of GDC Theog, along with the Chief Medical Officer from IGMC, Shimla. Faculty members, students, and volunteers actively participated in the event, making it a grand success. A team of expert doctors and medical staff from IGMC, led by Dr. Sahil, was present to conduct the donation process efficiently and safely.

Over 35 units of blood were collected, with donors including students, teachers, and local residents. Proper medical check-ups were conducted before the donation to ensure the well-being of donors. Refreshments and certificates of appreciation were provided to all participants as a token of gratitude for their noble act.

The camp highlighted the significance of blood donation in emergencies, especially for accident victims, cancer patients, and those undergoing major surgeries. It also helped in spreading awareness about road safety and responsible behaviour to reduce accidents.

The organizers extended their heartfelt thanks to IGMC Shimla for their medical support, as well as to all the donors and volunteers for making the event a success. The initiative served as an inspiration for many and reinforced the spirit of humanity and social responsibility among the youth.
