**Report on NSS Unit Collaboration with SOTTO Himachal Pradesh for
Organ Donation Awareness**

The NSS unit under the leadership of Dr. Vikas Nathan and Ms. Chetna Negi has taken a significant step towards social responsibility by collaborating with the State Organ and Tissue Transplant Organization (SOTTO) Himachal Pradesh. This collaboration aims to spread awareness about the importance of organ donation and encourage individuals to take the pledge for this noble cause.

Awareness cum Interactive Session As part of the initiative, an awareness cum interactive session on organ donation was conducted on 1st Oct, 2024. The session provided crucial information regarding the need for organ donation, its impact on saving lives, and the legal and medical aspects involved in the process. Volunteers actively participated in discussions, clearing their doubts and gaining deeper insights into the subject.

Participation and Pledge The event witnessed enthusiastic participation, with over 100 students in attendance. A key highlight of the session was the pledge-taking ceremony, where more than 20 volunteers including PO committed themselves to organ donation. This significant step reflects the growing awareness and willingness among young individuals to contribute towards this life-saving cause.

Memorandum of Understanding (MoU) Signing In addition to the awareness session, an official Memorandum of Understanding (MoU) was signed between the NSS unit and SOTTO Himachal Pradesh. This agreement solidifies the commitment of both entities to continue working together in promoting organ donation awareness and conducting similar events in the future.

The collaboration between the NSS unit and SOTTO Himachal Pradesh marks a milestone in promoting organ donation awareness. The event successfully educated and motivated students, fostering a sense of responsibility towards society. The initiative is expected to inspire more individuals to come forward and pledge their support for this humanitarian cause. Future activities under this collaboration will further strengthen awareness and encourage participation in organ donation drives.
