Report on Online Remedial Classes for B.Sc. 2nd Year Students Conducted by Dr. Vikas Nathan January–February 2025

To provide academic support and address learning gaps, online remedial classes were organized for B.Sc. 2nd year Chemistry students during the winter holidays in January and February 2025. These classes were conducted by Dr. Vikas Nathan, Assistant Professor of Chemistry, through virtual mode to ensure continuity in learning even during the vacation period. The sessions focused on important and challenging topics such as chemical kinetics, thermodynamics, and organic reaction mechanisms. The online format allowed students to attend from the comfort of their homes while actively participating in interactive lectures, doubt-clearing sessions, and practice problem-solving. Special emphasis was laid on concept reinforcement, revision of key topics, and preparation for the upcoming examinations. Students were also provided with digital study materials and worksheets for further practice. The initiative received positive feedback, as it not only helped students strengthen their academic foundation but also made effective use of the holiday period for productive learning.
