

Report on Faculty Development Programme on FrontAccounting-2.4.7 at Government Degree College, Theog

Conducted by

IQAC

On 19th February 2024, a successful Faculty Development Programme (FDP) on FrontAccounting-2.4.7 was organized at Government Degree College, Theog under the supervision of Dr. Vikas Nathan. The training was conducted in collaboration with the Spoken Tutorial Project, IIT Bombay. The course material provided by IIT Bombay facilitated the participants' learning, and the event culminated with an online exam to assess their understanding of the software.

The programme aimed to enhance the technical proficiency of faculty members in accounting software, with a focus on FrontAccounting-2.4.7, a widely used web-based accounting software system that helps users manage various aspects of financial operations. The FDP was part of a broader initiative to integrate technology and modern accounting tools into the college curriculum, equipping faculty members with practical skills that they can apply in academic and administrative tasks.

Participant, include the faculty of commerce, Dr. Neeraj Sharma. The training sessions were structured to cover important functionalities of FrontAccounting, such as financial management, inventory tracking, and reporting. This hands-on approach allowed the faculty to engage actively with the software and gain confidence in its application.

A major highlight of the programme was the online exam conducted remotely by IIT Bombay, which was a pre-requisite for certification. The assessment tested participants' knowledge of

FrontAccounting, focusing on real-world applications in an academic setting. Dr. Neeraj Sharma successfully completed the test, demonstrating their competency in the software.

The collaboration with IIT Bombay's Spoken Tutorial Project added credibility and value to the training, ensuring high-quality content and resources.

The Spoken Tutorial Approach

- Self explanatory - uses simple language
- Audio-video - uses multisensory approach
- Small duration - has better retention
- Learner-centred - learn at your own pace
- Learning by doing - learn and practice simultaneously
- Empowerment - learn a new Open Source Software

Target Audience

- Commerce Teachers
- Commerce Students
- Accountants
- Finance Professionals

Workshops

The Spoken Tutorial Team conducts workshops on several open source software that are useful for employment.

What is FrontAccounting?

FrontAccounting is an open source software.

It is a web-based accounting software for small to medium-sized enterprises.

FrontAccounting is available for free. It is released under the GNU General Public License.

Download FrontAccounting from <https://sourceforge.net>

Spoken Tutorials on FrontAccounting Series:

1. Installation of FrontAccounting on Linux OS
2. Installation of FrontAccounting on Windows OS
3. Setup in FrontAccounting
4. Banking and General Ledger
5. Items and Inventory
6. Sales in FrontAccounting
7. Purchases in FrontAccounting

Features of FrontAccounting software:

- Works on Linux, Windows and Mac operating systems
- Simple with clean and fast interface
- Automates accounting tasks
- Manages cash flow easily
- Reduces chances of error
- Personalized processes built to save time, money and anxiety
- Helps to manage all aspects of business - everything from job costing to inventory management to financial statements
- Gives a professional output
- Contains a number of ready to use reports

Benefits of using FrontAccounting:

- FrontAccounting is a free of cost and efficient accounting software.
- It provides support and upgradation from time to time.
- Accounting software knowledge is very much in demand among small and medium enterprises in India. But accounting software learning is not a part of the syllabus in commerce streams.
- FrontAccounting is a digital way to do the accounts. Learning this software will help students get a headstart in the job market.
- Only basic knowledge of computers is required to learn FrontAccounting.
- Anyone who learns the FrontAccounting software will be easily able to migrate to any commercial system like Tally.

Spoken Tutorial
Project at
IIT Bombay
