

Report on

Industrial Training-cum-Internship Opportunity Programme

Date: 31 August 2026

Venue: Government College Theog, Shimla, H.P.

Organized by: Career Counselling and Placement Cell (CCPC), Government College Theog

The Career Counselling and Placement Cell (CCPC), Government College Theog, organized an Industrial Training-cum-Internship Opportunity Programme with a special session on Artificial Intelligence (AI) on 31 August 2026 at the college. The programme was conducted with the support of Unisole Skill AI Labs and aimed to create awareness among students about industry-oriented skills, artificial intelligence, career opportunities, and internship programmes.

Approximately 100 students of B.A. and B.Sc. 1st Semester participated in the programme. The session provided students with valuable exposure to the growing importance of AI and emerging technologies in higher education and the employment sector. The resource persons highlighted the relevance of acquiring practical, industry-oriented skills alongside academic knowledge and explained how internship programmes can help students gain practical experience and improve their employability.

The students were motivated and encouraged to undertake internship programmes related to their respective courses. They were informed that internships provide an opportunity to apply classroom learning in practical situations, develop professional skills, explore career options, and gain valuable industry exposure.

The programme witnessed enthusiastic participation from the students, who showed keen interest in learning about artificial intelligence and future career opportunities. The interaction also encouraged students to think beyond conventional academic learning and focus on skill development from the beginning of their undergraduate studies.

At the conclusion of the programme, Prof. Anita Rathour, Convener, Career Counselling and Placement Cell (CCPC), Government College Theog, delivered the vote of thanks. She expressed gratitude to the resource persons, organizers, faculty members, and students for their valuable contribution and active participation in making the programme successful.

The programme was highly beneficial for the participating students and served as an important initiative towards skill development, career awareness, and promoting internship opportunities among undergraduate students.
