

REPORT ON WORLD OZONE DAY CELEBRATION 2026

Venue: Chemistry Laboratory

Date: 16th September, 2026

Time: 11a.m

Department of Chemistry

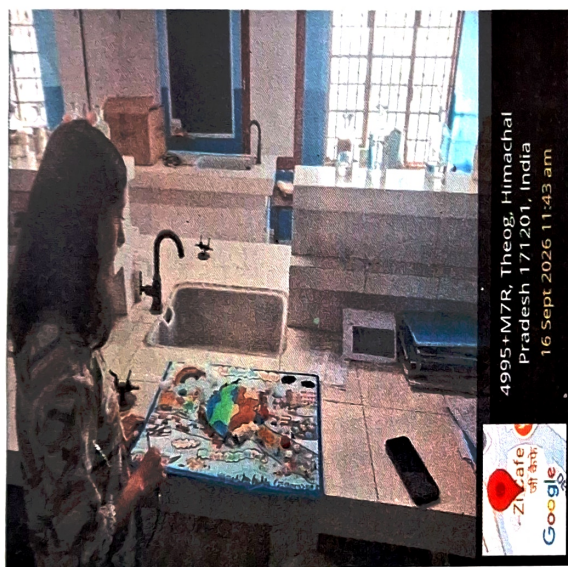

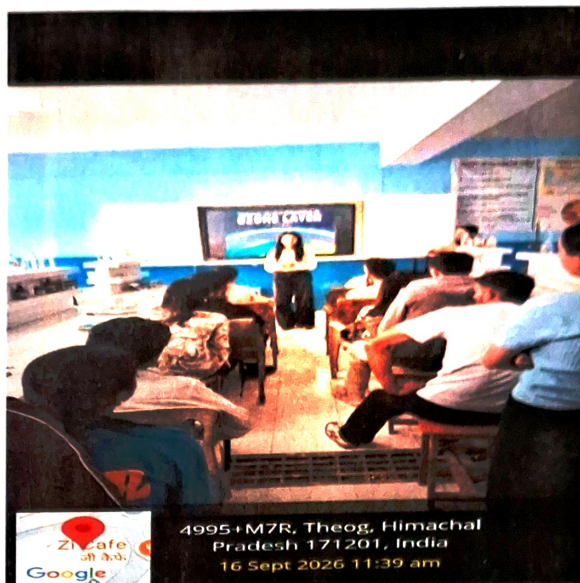

The Department of Chemistry, Government Degree College Theog, celebrated World Ozone Day on 16 September 2026 with the objective of creating awareness among students about the significance of the ozone layer and the serious environmental challenges associated with its depletion. The programme focused on the importance of protecting the ozone layer, understanding the causes and consequences of ozone depletion, addressing climate change, and promoting sustainable cooling practices.

The programme was organized to sensitize students towards contemporary environmental issues and to encourage them to develop a scientific understanding of the relationship between ozone depletion, greenhouse gases, global warming, and climate change. Through a combination of academic and co-curricular activities, students were provided an opportunity to express their ideas, creativity, and understanding of environmental protection.

A Poster-Making Competition was organized as one of the major activities of the celebration. Students prepared informative and creative posters highlighting various aspects of ozone layer protection, ozone depletion, greenhouse gases, global warming, climate change, and environmental conservation. The posters effectively communicated important environmental messages through illustrations, slogans, diagrams, and concise information. The activity encouraged students to explore environmental issues creatively while spreading awareness among their peers.

A Student Presentation Competition was also conducted, in which students presented their views and information on topics related to ozone layer depletion, greenhouse gases, global warming, climate change, sustainable development, and environmental protection. The presentations enabled students to develop their communication and presentation skills while strengthening their understanding of scientific and environmental concepts. Students actively participated and demonstrated considerable interest in discussing the causes, impacts, and possible solutions to environmental problems.

Overall, the World Ozone Day celebration at Government Degree College Theog was an informative, educational, and engaging initiative that successfully combined scientific awareness with student participation. It reinforced the importance of environmental responsibility and demonstrated the significant role educational institutions can play in promoting awareness and action for a sustainable future.
